§ 1050.51

from producers by such handler were used in each class.

[39 FR 15448, May 3, 1974, as amended at 58 FR 27845, May 11, 1993]

CLASS PRICES

§ 1050.50 Class prices.

Subject to the provisions of § 1050.52, the class prices for the month per hundredweight of milk containing 3.5 percent butterfat shall be as follows:

(a) *Class I price.* From the effective date hereof through April 30, 1988, and thereafter until amended, the Class I price shall be the basic formula price for the second preceding month plus \$1.61.

(b) *Class II price.* The Class II price shall be the basic formula price for the second preceding month plus \$0.30.

(c) *Class III price.* The Class III price shall be the basic formula price for the month.

[39 FR 15448, May 3, 1974, as amended at 46 FR 43381, Aug. 28, 1981; 51 FR 12832, Apr. 16, 1986; 60 FR 6610, Feb. 2, 1995]

§ 1050.51 Basic formula price.

The basic formula price shall be the preceding month's average pay price for manufacturing grade milk in Minnesota and Wisconsin using the "base month" series, as reported by the Department, adjusted to a 3.5 percent butterfat basis using the butterfat differential for the preceding month computed pursuant to § 1050.74 and rounded to the nearest cent, plus or minus the change in gross value yielded by the butter-nonfat dry milk and Cheddar cheese product price formula computed pursuant to paragraphs (a) through (e) of this section.

(a) The gross values of per hundredweight of milk used to manufacture butter-nonfat dry milk and Cheddar cheese shall be computed, using price data determined pursuant to paragraph (b) of this section and annual yield factors, for the preceding month and separately for the current month as follows:

(1) The gross value of milk used to manufacture butter-nonfat dry milk shall be the sum of the following computations:

(i) Multiply the Grade AA butter price by 4.27;

(ii) Multiply the nonfat dry milk price by 8.07; and

(iii) Multiply the dry buttermilk price by 0.42.

(2) The gross value of milk used to manufacture Cheddar cheese shall be the sum of the following computations:

(i) Multiply the Cheddar cheese price by 9.87; and

(ii) Multiply the Grade A butter price by 0.238.

(b) The following product prices shall be used pursuant to paragraph (a) of this section:

(1) *Grade AA butter price.* Grade AA butter price means the simple average for the month of the Chicago Mercantile Exchange, Grade AA butter price, as reported by the Department.

(2) *Nonfat dry milk price.* Nonfat dry milk price means the simple average for the month of the Western Nonfat Dry Milk Low/Medium Heat price, as reported by the Department.

(3) *Dry buttermilk price.* Dry buttermilk price means the simple average for the month of the Western Dry Buttermilk price, as reported by the Department.

(4) *Cheddar cheese price.* Cheddar cheese price means the simple average for the month of the National Cheese Exchange 40-pound block Cheddar cheese price, as reported by the Department.

(5) *Grade A butter price.* Grade A butter price means the simple average for the month of the Chicago Mercantile Exchange Grade A butter price, as reported by the Department.

(c) Determine the amounts by which the gross value per hundredweight of milk used to manufacture butter-nonfat dry milk and the gross value per hundredweight of milk used to manufacture Cheddar cheese for the current month exceed or are less than the respective gross values for the preceding month.

(d) Compute weighting factors to be applied to the changes in gross values determined pursuant to paragraph (c) of this section by determining the relative proportion that the data included in each of the following paragraphs is of the total of the data represented in paragraphs (d)(1) and (d)(2) of this section:

§ 1050.52

(1) Combine the total nonfat dry milk production for the States of Minnesota and Wisconsin, as reported by the Department, for the most recent preceding period, and divide by the annual yield factor for nonfat dry milk, 8.07, to determine the quantity (in hundredweights) of milk used in the production of butter-nonfat dry milk; and

(2) Combine the total American cheese production for the States of Minnesota and Wisconsin, as reported by the Department, for the most recent preceding period, and divide by the annual yield factor for Cheddar cheese, 9.87, to determine the quantity (in hundredweights) of milk used in the production of American cheese.

(e) Compute a weighted average of the changes in gross values per hundredweight of milk determined pursuant to paragraph (c) of this section in accordance with the relative proportions of milk determined pursuant to paragraph (d) of this section.

[60 FR 18966, Apr. 14, 1995]

§ 1050.52 Plant location adjustments for handlers.

(a) The Class I price for producer milk at a plant located outside the State of Illinois or in the State of Illinois but north of the northernmost boundaries of the counties of Mercer, Henry, Bureau, La Salle, Grundy, and Kankakee shall be reduced 10 cents if such plant is 50 miles or more from the City Hall in Peoria, Illinois, plus an additional 2.0 cents for each 10 miles or fraction thereof that such distance exceeds 60 miles. Distances applied pursuant to this paragraph shall be the shortest hard-surfaced highway distances as determined by the market administrator from the latest Mileage Guide as published by the Household Goods Carrier's Bureau.

(b) For purposes of calculating such adjustment, bulk transfers between pool plants shall be assigned Class I disposition at the transferee-plant only to the extent that 105 percent of Class I disposition at the transferee-plant exceeds the sum of receipts at such plant from producers and cooperative associations pursuant to § 1050.9(c), and the volume assigned as Class I to receipts from other order plants and unregu-

7 CFR Ch. X (1-1-97 Edition)

lated supply plants; such assignment to be made first to transferor-plants at which no location adjustment credit is applicable and then in sequence beginning with the plant at which the least location adjustment would apply.

(c) The Class I price applicable to other source milk shall be adjusted at the rates set forth in paragraph (a) of this section, except that the adjusted Class I price shall not be less than the Class III price.

[39 FR 15448, May 3, 1974, as amended at 52 FR 3415, Feb. 4, 1987]

§ 1050.53 Announcement of class prices.

The market administrator shall announce publicly on or before the fifth day of each month the Class I price and the Class II price for the following month, and the Class III price for the preceding month.

[60 FR 6610, Feb. 2, 1995]

§ 1050.54 Equivalent price.

If for any reason a price quotation required by this part for computing class prices or for other purposes is not available in the manner described, the market administrator shall use a price determined by the Secretary to be equivalent to the price which is required.

UNIFORM PRICE

§ 1050.60 Handler's value of milk for computing uniform price.

For the purpose of computing the uniform price, the market administrator shall determine for each month the value of milk of each handler with respect to each of his pool plants and of each handler described in § 1050.9 (b) and (c) as follows:

(a) Multiply the pounds of producer milk in each class as determined pursuant to § 1050.44 by the applicable class prices and add the resulting amounts;

(b) Add the amounts obtained from multiplying the pounds of overage subtracted from each class pursuant to § 1050.44(a)(14) and the corresponding step of § 1050.44(b) by the respective class prices, as adjusted by the butterfat differential specified in § 1050.74, that are applicable at the location of the pool plant;
